

Safety and Security: Facebook Encryption

Safety and Security: Facebook Encryption | Tech Tips Video by PcCG

Many people browse facebook without even the most basic protections. We have put together a short 2 minute video that demonstrates how to enable SSL (Secure Socket Layer) to ensure your facebook transmissions are encrypted. You can then see the result of this, and know your information is protected when you see "https" across the address bar, instead of the classic "http". The S at the end indicates it's secure. It's quick, and very easy.
