Blazing Fast Computer

Blazing Fast Computer | Tech Tips Video by PcCG

I received a call from Kevin of Advance Auto to build a custom gaming PC for his son. Provided with a $1700 budget, I was able to build a system based on an i5 Processor, 8GB RAM, nVidia 560TI Graphics card, USB 3.0, a 1TB Traditional drive and the icing on the cake was a 256GB SSD drive. The computer is packed with other features such as 4 quiet fans, an excellent case, optical and hdmi outputs, SLI capability and more. I was so impressed with the speed of the system that I had to create a video to demonstrate this computer to you! The computer is able to boot windows in less than 15 seconds (from the Starting Windows screen to finish). Enjoy!
